AI Prompt Library for Content Teams

How to use the library

Every prompt follows the same five-part formula, so a team can swap in a new topic and get on-brand output without rewriting from scratch.

Part	What it does	Example
Role	Tells the AI who it is writing as	"You are a direct-response copywriter for a local fitness studio."
Task	States the one thing to produce	"Write a 30-second video script."
Context	Gives the facts: product, audience, offer	"Audience: busy parents. Offer: free first class."
Voice	Points to the brand-voice guide below	"Follow the brand voice: friendly, plain, no hype."
Format	Says exactly how the output should look	"Hook, three beats, call to action. Under 80 words."

Rules

- Replace every [bracket] before you send a prompt.
- Paste the brand-voice guide into the conversation first, or attach it to the prompt.
- Treat the first output as a draft; ask for one revision at a time.
- Check every fact, number and claim. AI tools can invent details.
- Record each test in the test log at the end.

Brand-voice guide (fill in per client)

Complete one of these for each brand before you write anything. The sample answers show the level of detail to aim for.

Field	Your answer	Sample
Brand name and what it sells	Bright Studio (a practice brand for this library): small-group fitness classes, 45 minutes each, up to 8 people	Bright Studio, small-group fitness classes
Audience	Busy parents aged 28 to 45 who are new to exercise or returning after a long break	Busy parents, 28 to 45, new to exercise

Field	Your answer	Sample
Three tone words	Friendly, plain, encouraging	Friendly, plain, encouraging
Sounds like	A supportive coach who meets you where you are, never a drill sergeant	A supportive coach, not a drill sergeant
Words and phrases to use	"Start where you are", "small steps", "your pace", "free first class"	"Start where you are", "small steps", "your pace"
Words and phrases to avoid	"No pain, no gain", "shred", "guaranteed results", "transform your body", "limited spots"	"No pain, no gain", "shred", "guaranteed results"
Sentence style	Short sentences, active voice, one idea each, ideally under 20 words	Short sentences, active voice, one idea each
Claims rule	No health, weight-loss or income promises. Use only provable facts: 45-minute classes, groups of up to 8, free first class	No health or income promises; only facts the client can prove
Call-to-action style	Soft and specific, one per ad like "Book your free first class"	Soft and specific: "Book your free first class"

Voice instruction to paste into any prompt

Brand voice: [three tone words]. Write like [sounds like]. Use phrases such as [use list]. Never use [avoid list]. Use short sentences and an active voice. Make no claims that cannot be proven.

Script prompts

S1. Short video hook and script:

You are a short-form video scriptwriter for [brand]. Write a [30]-second script about [topic] for [audience]. Follow this brand voice: [voice instruction]. Structure: a hook in the first 3 seconds, three short beats, and a call to action to [action]. Give spoken lines and on-screen text separately. Under [80] words.

S2. Ten hook options:

Write 10 different opening hooks for a short video about [topic] aimed at [audience]. Vary the style: question, bold claim, story, number, and contrast. Keep each under 12 words. Brand voice: [voice instruction]. Mark the 3 you think are strongest and say why in one line each.

S3. UGC-style ad script:

Write a 25-second UGC-style ad script in the first person, as a real customer of [product]. Include the

problem the customer had, the moment they tried [product], and one specific result they can honestly describe: [real result]. Sounds like a casual phone video, not an advert. Brand voice: [voice instruction]. Do not invent statistics.

S4. Explainer script:

Write a 60-second explainer script that teaches [audience] how to [skill or process] in [3] steps. Use plain words, one idea per sentence, and an example for each step. End with one next step they can take today. Brand voice: [voice instruction].

S5. Repurpose a blog post into a script:

Turn the blog post below into a 45-second video script. Keep the 3 most useful points, drop the rest, and open with a hook. Brand voice: [voice instruction]. Blog post: [paste text]

Ad copy prompts

A1. Social ad, three angles:

You are a direct-response copywriter for [brand]. Write 3 versions of a social media ad for [product or offer], each using a different angle: pain point, benefit, and social proof. Audience: [audience]. Each version: headline under 8 words, body under 40 words, one call to action. Brand voice: [voice instruction]. Use only these facts: [list facts].

A2. Headline testing set:

Write 15 headlines for an ad promoting [offer] to [audience]. Group them by style: curiosity, benefit, urgency, and question. Keep each under 10 words. Do not use clickbait, false urgency, or claims I have not given you. Brand voice: [voice instruction].

A3. Problem, agitate, solution ad:

Write a short ad using the problem-agitate-solution structure for [product]. Problem: [problem]. Show why it matters without exaggerating, then present [product] as the solution. Under 90 words. End with a call to action to [action]. Brand voice: [voice instruction].

A4. Email subject lines and preview text:

Write 10 email subject lines with matching preview text for a message about [topic] sent to [audience]. Subject lines under 45 characters, preview text under 90. Avoid spam trigger words and all-caps. Brand voice: [voice instruction].

A5. Ad variations from a winning ad:

Below is an ad that performed well. Write 5 new variations that keep the same core message but change the hook, the opening line, and the call to action. Keep the same length and brand voice: [voice instruction]. Original ad: [paste ad]

Blog post prompts

Use these in order: topic, outline, draft, edit, then SEO.

B1. Topic ideas:
Suggest 10 blog post ideas for [brand] aimed at [audience] who want to [goal]. For each, give a working title, the question it answers, and the search phrase someone might type. Avoid topics that need expert claims I cannot support.

B2. Outline:
Create an outline for a blog post titled "[title]" for [audience]. Include an intro that states the problem, 4 to 6 sections with a one-line summary each, and a closing with one next step. Target length: [1,000] words.

B3. First draft from outline:
Write the first draft of a blog post from this outline: [paste outline]. Brand voice: [voice instruction]. Use short paragraphs, plain words, and a subheading for each section. Do not invent statistics, quotes or studies; if a fact is needed, write [ADD FACT] instead.

B4. Edit for voice and clarity:
Edit the draft below. Keep my meaning. Cut filler, shorten long sentences, replace jargon with plain words, and match this brand voice: [voice instruction]. Show the edited version, then list the 5 biggest changes you made. Draft: [paste draft]

B5. SEO title and description:
For the blog post below, write 5 SEO title options under 60 characters and 3 meta descriptions under 155 characters. Include the main phrase "[keyword]" naturally. Make each description accurate to the post and end with a reason to click. Post: [paste post]

Before and after

This is the strongest proof in the library. Run both prompts below in the same tool, paste the real outputs, and say honestly which was better and why. Do this for at least 3 prompts.

Weak prompt:
Write an ad for my fitness studio.

Improved prompt (A1 from this library):
You are a direct-response copywriter for Bright Studio, a small-group fitness studio. Write 3 versions of a social media ad for our free first class, each using a different angle: pain point, benefit, and social proof. Audience: busy parents aged 28 to 45 who are new to exercise. Each version: headline under 8 words, body under 40 words, one call to action. Brand voice: friendly, plain, encouraging; no hype, no guaranteed results. Use only these facts: classes are 45 minutes, groups are limited to 8, the first class is free.

Item	Weak prompt	Improved prompt
Tool and date tested	Claude, 4th June 2026	Claude, 4th June 2026
Output	"Transform your body at our fitness studio! Join	Version 1, pain point.

Item	Weak prompt	Improved prompt
	today for expert trainers, state-of-the-art equipment and classes for every level. Sign up now and get your first week free. Limited spots available. Your best self starts here!"	Headline: "No time to work out?" Body: "Between school runs and work, exercise slips. Our classes take 45 minutes, and your first one is free." CTA: "Book your free first class." Version 2, benefit. Headline: "Small groups, no pressure" Body: "Groups are limited to 8, so you are never lost in a crowd. Each class is 45 minutes. Start at your own pace." CTA: "Claim your free first class." Version 3, social proof. Headline: "Join a small, friendly group" Body: "Every class has 8 people at most, and your first class is free. [Add a real member quote or number here.]" CTA: "Book your free first class."
Matches the brand voice?	No. It uses hype like ("transform your body", "your best self starts here") and false urgency, which the brand-voice guide bans.	Yes. Friendly, plain and encouraging, with short sentences, no hype and one soft call to action per version.
Invented any facts?	Yes, several like "expert trainers", "state-of-the-art equipment", "first week free" and "limited spots" were never given.	No. Every claim comes from the three facts supplied (45-minute classes, groups of 8, free first class). Where proof was missing, it left a placeholder instead of inventing a testimonial.
Edits I had to make	Many like removing every invented claim, adding the real offer, cutting the hype, rewriting the headline and shortening it to fit an ad.	Few like replacing the placeholder in version 3 with a real quote or number, then picking the strongest version to test.

Item	Weak prompt	Improved prompt
My verdict	Unusable as written. It sounds generic and invents facts that could mislead customers.	Much better. On-brand, accurate and ready to test after one small edit. The detail in the prompt (role, audience, length limits, allowed facts) is what changed the result.
